There are 2 fields in Applied Micro: The **Labor field** and **Population field**.

Students who plan to specialize in applied micro are strongly encouraged to take all Applied Micro courses.

### Course Offerings

#### Labor Economics Field

- 261A. Labor Economics I  
  (Fall 18, Professor Mazzocco)

- 261B. Labor Economics II  
  (Winter 19, Professor Buchinsky)

- 262A. Methods in Policy Evaluation: Causality and Identification  
  (Spring 19, Professor Pinto) *Cross-listed with Population*

#### Population and Public Sector Economics Field

- 262P. Topics in Labor Economics  
  (Fall 18, Professor Von Wachter)

- 262F. Topics in Labor Economics: Public Sector Microeconomics  
  (Spring 19, Professor Kung)

- 262A. Methods in Policy Evaluation: Causality and Identification  
  (Spring 19, Professor Pinto) *Cross-listed with Labor*

**Required courses in either field:** Students are required to take 3 courses in their field.

**NOTE:** It is strongly recommended that students who wish to specialize in Applied Micro choose one of the following options. **Either**, take both applied fields or take one applied field and pick courses from the other applied micro field as part of the breadth option.

### Requirements

In either field:
• **Course work**: Students must pass a total of 3 courses with a grade of a B or better. An econometrics course must be one of the 3 courses.

• **Second year paper**: Every student must write an **empirical paper** by the end of the second year and receive a passing grade. The topic can be chosen from any of the courses taught in the applied fields. Students enrolled in both applied fields need only write one empirical paper. A separate memo lists the requirements and deadlines for the second year paper.

• **Proseminar presentation**: Each student must present his second year paper in the Proseminar.

• **Field exam**: Every student must pass a **second year field exam** in those fields in which he or she is enrolled. Each field exam will consist of multiple sections.

• **ATC**: Students who have not completed all of their field requirements successfully will not be allowed to pass their ATC. In other words, you must have received a passing grade in the second year paper and in all the second year field exams before the ATC.

Students must receive a passing grade in **BOTH** the paper and the field exam(s). **Students who fail either requirement will not be allowed to continue in the Ph.D. program.**

**Additional Guidelines**

• Every student must choose an advisor to guide them in writing their empirical paper which will be the basis for the oral examination to advance to candidacy at the end of the second year. After the second year students are strongly advised to always work under the supervision of at least one faculty member and to have a main advisor.

• Students must present a paper **each year** in the proseminar, starting in the second year.

• Students are required to attend the applied micro seminar and the applied proseminar. Students cannot present their second year papers in the proseminar in subsequent years, unless they have made large substantive changes to the work AND obtain prior approval from their advisor.

**Applied Micro Faculty**

The following faculty areas are part of the applied micro faculty and can serve as advisors in the Applied Micro field:

Moshe Buchinsky, Edward Kung, Adriana Lleras-Muney, Maurizio Mazzocco, Kathleen McGarry, Rodrigo Pinto, Till von Wachter
