## SELECTED RESEARCH GRANTS AND PROJECTS

- \$3.89 million (Pending, scored 5th percentile 10/2019) Bailey, PI: NIH, R01-HD100438  
“The Effects of Unintended Pregnancy on Children”  
This project expands the scope of the M-CARES project to examine the effects of mother’s financial access to contraceptives on their children who were born before the intervention.
- \$ 241,236 Bailey, PI: National Science Foundation 1757063/ 1757092, 2018-20 (with Tanya Byker)  
“Measuring the Long-Term Effects of California’s 2004 Paid Family Leave with Tax Data”  
This project uses administrative IRS-tax data to understand how California’s 2004 paid leave statute affected parents’ careers and family structure over its first decade in existence.
- \$1.07 million Bailey, PI: NIH, R01-AG057704, 2018-21  
“Longitudinal and Intergenerational Determinants of Aging and Mortality”  
This project uses innovations in automated indexing and machine learning to digitize and cross-validate hand-written cause of death information and add this variable to the LIFE-M data.
- \$ 427,395 Bailey, PI: NIH, R21-AG05691201, 2017-19  
“How Does Automated Record Linkage Affect Inferences about Population Health?”  
This project uses innovations in machine learning to develop new methods for historical record linkage as part of the LIFE-M project.
- \$5.99 million Bailey, PI: Laura and John Arnold Foundation, 2017-22  
“Michigan Contraceptive Access, Research, and Evaluation Study (M-CARES)”  
M-CARES is a large-scale randomized control trial that examines the short- and long-run causal effects of increasing financial access to contraceptives in the United States. Following participants and their families in three surveys and administrative data (e.g., tax records, credit reports, birth certificates, health records, and Census data), M-CARES will quantify how subsidizing contraception affects women’s choice of contraceptives, pregnancy, and childbearing. We will also generate novel experimental evidence for less commonly studied outcomes, including physical health and health care use; educational attainment and labor-market outcomes; financial security; relationship quality; mental health and well-being; and receipt of public benefits.
- \$2.13 million Bailey, PI: National Science Foundation, SMA 1539228, 2015-19  
“RIDIR: The Longitudinal Intergenerational Family Electronic Micro-Database (LIFE-M)”  
Some of the most important questions in social science and public policy relate to how individuals’ lives, health, and experiences have changed across time. But most data spanning the 20th century are cross-sectional—large sets of individuals at *one* point in time. The LIFE-M project is transforming vital records (birth, marriage, death certificates) and Census data into the first longitudinal and intergenerational micro-database to span much of the late 19th and most of the 20th centuries. Once completed, LIFE-M will facilitate the study of economic and geographic mobility and family formation and dissolution over the 20th century. It will also enhance our understanding of the long-term impacts of adverse events, public policies, and family background.
- \$ 921,018 Bailey, PI: Laura and John Arnold Foundation, 2015-19  
“Evaluating the Long-Term Effects of Four War on Poverty Programs”  
This project uses large-scale administrative Census data linked to the NUMIDENT file to evaluate the long-run economic effects of four War on Poverty programs: Head Start, Food Stamps, Community Health Centers, and Family Planning Programs.
- \$1.77 million Bailey, PI: NIH, R01-HD070950, 2012-17  
“Community Care for All? Health Centers’ Impact on Access to Care and Health”
- \$ 154,500 Bailey, PI: NIH, R03-HD066145, 2010-12  
“Documenting the War on Poverty’s Community Programs”
- \$ 39,795 Bailey, PI: NIH, R03-HD058065-Administrative Supplement, 2009-10

“The Impact of Family Planning on the Health and Well-Being of U.S Women and Children: Evidence from the War on Poverty”

\$ 148,667 Bailey, PI: NIH, R03-HD058065, 2008-10  
“The Impact of Family Planning on the Health and Well-Being of U.S Women and Children: Evidence from the War on Poverty”
